

Visual Identity Manual

Brand Identity Guidelines

What's Inside the **Brand Book**?

This section highlights the key elements that shape our brand. It provides a clear guide to ensure consistency across every platform, helping everyone represent our identity with confidence, clarity, and purpose.

01

Brand
Logo

Primary Logo

The Prolift Systems logo is the core of our brand identity. It combines a geometric shape with clean typography to create a design that is simple, distinctive, and easy to recognize. Representing trust, innovation, and forward momentum, the logo serves as a consistent and memorable mark across all brand applications.

Dark Background

The main logo is best used on dark background, paired with a color variation that enhances visibility and contrast. This ensures the logo remains clear, professional, and visually impactful in every application.

Reverse Color Logo

The reverse logo is designed for light or bright backgrounds. By inverting the colors, it maintains balance, legibility, and a professional appearance, ensuring the Travio brand remains recognizable in every setting.

Black & White Version

The black and white logo is used when color printing isn't possible or a minimal look is required. It keeps the Prolift Systems brand clear, professional, and recognizable in all settings.

Social Media Profile

The Prolift Systems Social Media Profile is a simplified version of the logo, designed for use in digital applications such as mobile and desktop platforms. It maintains the core elements of the brand while ensuring clarity, scalability, and instant recognition, even at smaller sizes.

Brand Pattern

02

Logo Usage

Exclusion

The exclusion zone is the clear space around the Prolift Systems logo, equal to the height of the "P". No other elements should appear within this area to maintain clarity and impact.

Optimal Size

The Prolift Systems logo should always be displayed at a size that keeps it clear and easy to read. Avoid using the logo at size so small that details are lost or legibility is reduced.

700 PX

420 PX

252 PX

Co Branding

In co-branding, the Prolift Systems logo must remain clear, balanced, and unchanged. Maintain equal spacing and ensure neither logo overpowers the other.

Logo Dont's

Don't change the color

Don't distort the logo

Don't outline the logo

Don't rotate the logo

Don't use effects

Don't blur the logo

03

Brand
Color

Primary Colors

The primary color palette defines Prolift's core visual identity. These colors should be used consistently across all brand materials to ensure recognition and harmony. They represent the brand's personality and create a unified look in both digital and print applications.
